A fresh addition to our collection is the Scandinavian cabinet series with a light blonde color. Secrétaire Oskar, wall cabinet Filippa and the Lasse lowboard are finished with oak veneer.

The secretaire connects various residential functions. With shelves, it serves as a storage place, but is also a home workplace and provides space to display favorite accessories. Thanks to the same color on the wall behind the secretaire,

personal items get the attention they deserve! The Filippa wall cabinet is elegant, more feminine and just a little bit different.

With the Lasse lowboard you can create a sturdy, Scandinavian atmosphere in your interior in an instant and offers many storage options. This series with refined details guarantees peace and unity in the interior.

# YES, I WOOD

Our tables are made of new wood, from natural wild oak. This is popularly called rustic oak. That means every tree is different. The table in the showroom will be different from the table you will receive, because each tree grows under different living conditions. These differences manifest themselves in different wood grains, deformities, cracks, pores and make every wooden furniture unique. Grooves, cracks and knots are worked with traditional instruments and the rustic look is preserved.

# WOOLEN CARPETS

Our woolen carpets are durable and hand-made so every carpet is unique. The wool is dyed in color and has a matte appearance. The addition of viscose creates more shine and depth in the carpet.

Woolen carpets are made of woolen fibers that have been twisted into long strings. In use small wool fibers can release. That is normal and nothing to worry about. The mixing with the viscose yarn ensures that this is limited.

The Bodilson carpets are provided with a backing; a stiff cotton cloth that is attached to the woolen cloth. As a result, the carpet remains nicely flat and an underlay is in principle not necessary.
