HAY FURNITURE NEWS

HAY was founded with the ambition to create contemporary furniture and accessories that accommodate modern lifestyles, using quality craftsmanship and innovative industrial production. Working together with some of the world's most talented and spirited designers, HAY combines the structural character of architecture with the dynamic nature of fashion to create durable products shaped by good ideas, technical skill, and the best materials available. We work continually to understand new ways of living, always striving to meet the evolving needs of domestic, public, and professional spaces through smart, beautiful, and functional design.

Norwegian designers Andreas Engevik and Daniel Rybakken collaborated with HAY to create an environmental friendly sofa with the Nordic Swan Ecolabel

ARBOUR ECO

Designed by Daniel Rybakken
and Andreas Engesvik

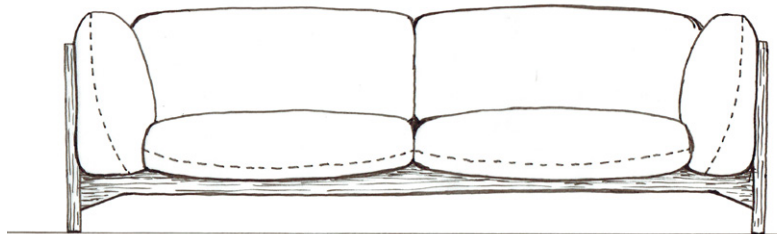

Embodying the concept that design should follow construction, Andreas Engesvik and Daniel Rybakken's Arbour is assembled from separate components that have been independently produced for optimal comfort, quality, and efficiency. This sofa was developed with an intention to create a durable sofa that would qualify for the Nordic Swan Ecolabel within the European market, and it features FSC-certified wood for the frame and selected, eco-labelled upholsteries for the covers. The seat and back cushions are made in carefully balanced proportions, with identical side cushions creating a sense of harmony and offering the opportunity for multiple comfortable sitting or lying positions, while the frame creates a strong yet elegant profile with an architectural quality. With its logical construction and uncluttered design language, Arbour Eco fuses its distinctly Scandinavian aesthetics with high comfort and great durability.

Arbour Eco uses Oeko-Tex foam, EU-Ecolabelled textiles and FSC-certified wood

With its logical construction and uncluttered design language, Arbour Eco fuses its distinctly Scandinavian aesthetics with high comfort and durability

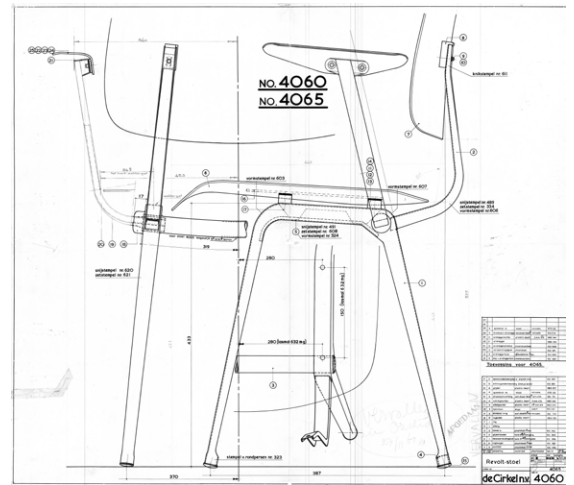

Revolt uses a mix of recycled post consumer and virgin ABS material for its seat and back

REVOLT

Originally designed by Friso Kramer for Ahrend, relaunched by HAY with Ahrend

A new addition to the ongoing series of relaunched by HAY and Ahrend and a cousin to the Result Chair, the iconic Revolt Chair embodies Kramer's distinctively innovative, minimalist style. Distinguished by its flexible back, its versatility, and its extreme comfort, Revolt is perfectly suited to the dynamic nature of the contemporary lifestyle, as it can be used in various settings and many contexts, from office work to studying or even long evenings at the dining table.

A dynamic and flexible chair, Revolt's ergonomic design moves with its user, offering active support

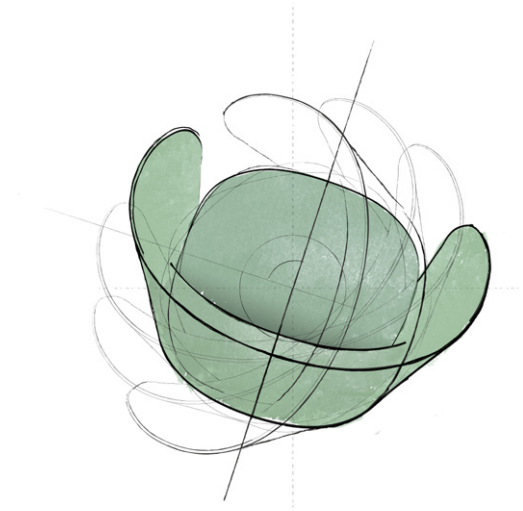

GamFratesi's designs are characterised by an honest, natural expression, and the desire to communicate a story through the use of tradition, innovation and functionality

DORSO

Design by GamFratesi

Inspired by the shifting curves of a human torso in motion, GamFratesi's Dorso chair contains a surprise function not usually achievable in such a clean, compact package: 360-degrees of rotation. This relaxing and functional chair combines the generous, embracing feel of a lounge chair with a swivel function and a sleek silhouette, both of which are rare in that typology. Dorso's elegant appearance and flexible use make it suitable for many different contexts, from conference rooms, lounges, and waiting areas in public environments to homes and other private settings.

Inspired by the shifting curves of a human torso in motion, GamFratesi's Dorso combines a rounded exterior with a rotating base

Dorso, Olavi by HAY 16

The result of an eight-year journey, Daniel Rybakken's Petit Standard is a study in precision and considered details

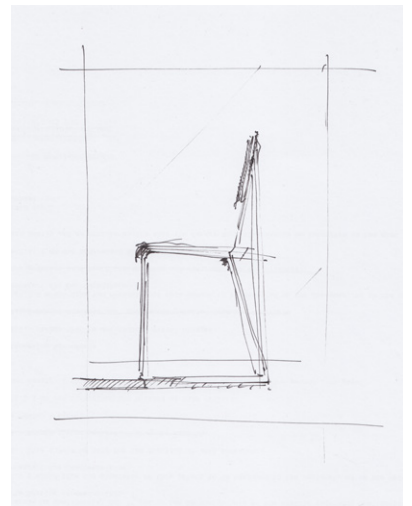

PETIT STANDARD

Design by Daniel Rybakken

The Petit Standard chair fuses elegance and functionality, with its high back and curved seat ensuring great comfort and its rigid tubing optimising its strength and stackability. Featuring ingenious links made from die-cast aluminium, Petit Standard has no visible weldings, creating an extremely fluid and homogenic aesthetic experience, without any interruptions.

The high back and curved seat ensure great comfort, while the rigid tubing optimises the chair's strength and stacking ability

French designer Inga Sempé is known for a lightness of touch, a distinct tactility, and a bold design language

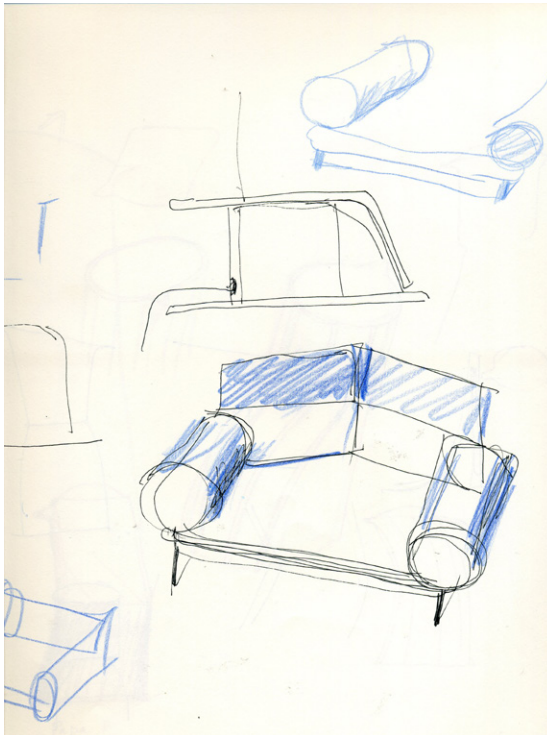

PANDARINE

Designed by Inga Sempé

Inga Sempé's Pandarine fuses the luxurious comfort of a bed with the versatility of a modular sofa in an elegant and versatile design. The armrests come either in a cylindrical form, or with a reclining design that can be adjusted individually in the same way as the metal-hinged backrests. This gives Pandarine the ability to transform into a unified, mattress-like surface where the backrests serve as huge, soft pillows. Pandarine is designed to provide exceptional comfort in any number of sitting or lying positions.

Pandarine is a highly functional sofa with ample, generous seating space and fully adjustable backrests and armrests

Pandarine, Mode Clavicle 009

A new eco-friendly addition to the About A family,
designed by Hee Welling & HAY

ABOUT A ECO COLLECTION

Design by Hee Welling & HAY

A new eco-friendly addition to the About A family, designed by Hee Welling & HAY, the About A Eco Collection emphasizes sustainability while retaining the fundamental aesthetic and versatility of the About A series. About A Eco collection is certified with the EU Ecolabel, which signifies that 30% of the PP material used is recycled waste material from our own About A production lines, while the wooden base is available in solid FSC-certified oak with a water-based lacquer. Every product in the About A Eco Collection can be fully disassembled and recycled.

About A Soft collection is a new line of chairs and lounges with a relaxed, comfortable expression

ABOUT A SOFT COLLECTION

Design by Hee Welling & HAY

With the objective of supplementing HAY's iconic AAC chair series with a softer, more organic expression, the collection features the softness and warmth of the quilted shell, whilst retaining the fundamental mission of creating a connected family of chairs based around one simple, strong idea. Available in a variety of interchangeable base types in wood, aluminium or steel and numerous upholstery options, the About A Soft series is a versatile and functional collection suited to a wide variety of domestic, professional, and public settings.

The AAC Soft collection counterbalances its soft, quilted shell with the high functionality and varied expression offered by a choice in bases

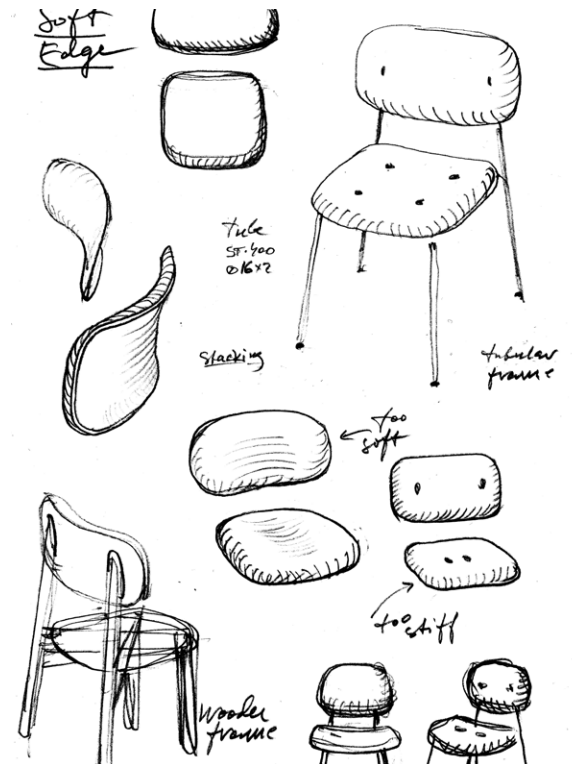

AAL 87 Soft, Swarm Multi Colour

SOFT EDGE

Design by Iskos Berlin

Iskos-Berlin's Soft Edge series was originally created by exploring innovative developments in moulded plywood techniques. The Copenhagen-based design duo collaborated with HAY to push the boundaries of industrial moulding, combining strong curves with extreme lightness to create a minimalistic design with dynamic comfort. All the edges of the ultra-thin, soft-formed seats are bent away from the body, designed to optimise human-centric comfort for constant shifting and movement.

Compact and extremely comfortable,
Soft Edge has a small environmental footprint
and a modest yet striking aesthetic profile

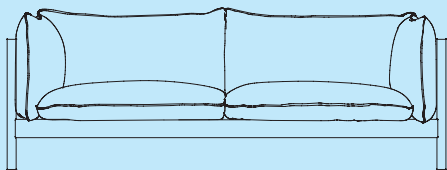

Soft Edge 10 Sled
